

## REACH - On the safe side with Siebert

### Registered Siebert coolants and high-performance greases

**Siebert coolants** are preparations which are not subject to the registration obligation of REACH. However, the raw materials used must comply with the requirements of REACH. All Siebert products are REACH compliant. Therefore, all relevant ingredients that are not expressly excluded from the directive, must be registered under the REACH rules.

In addition, Siebert, together with other lubricant manufacturers in Europe consortia ensure that all chemical products used in **Siebert high-performance greases** are used, pro-actively researched, documented and registered.

#### At a glance:

- All Siebert products are REACH compliant
- Ingredients are registered according to REACH
- Safety through transparency of ingredients
